# The vCIO/CTO

**V**irtual CIOs are experts in understanding, implementing, and managing technology to meet your strategic objectives, drive revenue, protect your business, and improve your processes. The decision to include a vCIO in your leadership team provides expert experience and knowledge in a cost-effective manner.

Your vCIO will partner with the leadership team to understand the strategic objectives, offer technology-based strategic considerations, architect and execute initiatives to meet these objectives, and develop resources and relationships, both internal and external, to support the business.

## vCIO/CTO Benefits

1. **Develop your ideas into revenue generating products**
2. **Manage projects, resources, and budgets**
3. **Reduce overhead compared to a full-time CIO**
4. **Support existing overloaded executives**

## What is the future of your company?

| Do you believe technology can or will play a significant role? | Is your technology environment growing more complex? | Are you satisfied with your top and bottom line growth? | Do you have a unique differentiator relative to your competition? | Have you minimized your cybersecurity risks? |
|---|---|---|---|---|

## In Summary

A vCIO understands thechanging technology landscape, continually identifying new opportunities and risks

A vCIO aligns technology initiatives and resources to support your organization's strategic plan

A vCIO maximizes the effectiveness of your cybersecurity investment and minimizes risk

A vCIO creates a positive technology environment to boost team morale, reduce attrition, and build skills

A vCIO acts as an effective liaison between the executive team, IT resources, and the entire employee base

A vCIO ensures your technology budget is documented, justified, and appropriate to support strategic objectives
